

UNAIDED REBOARDING

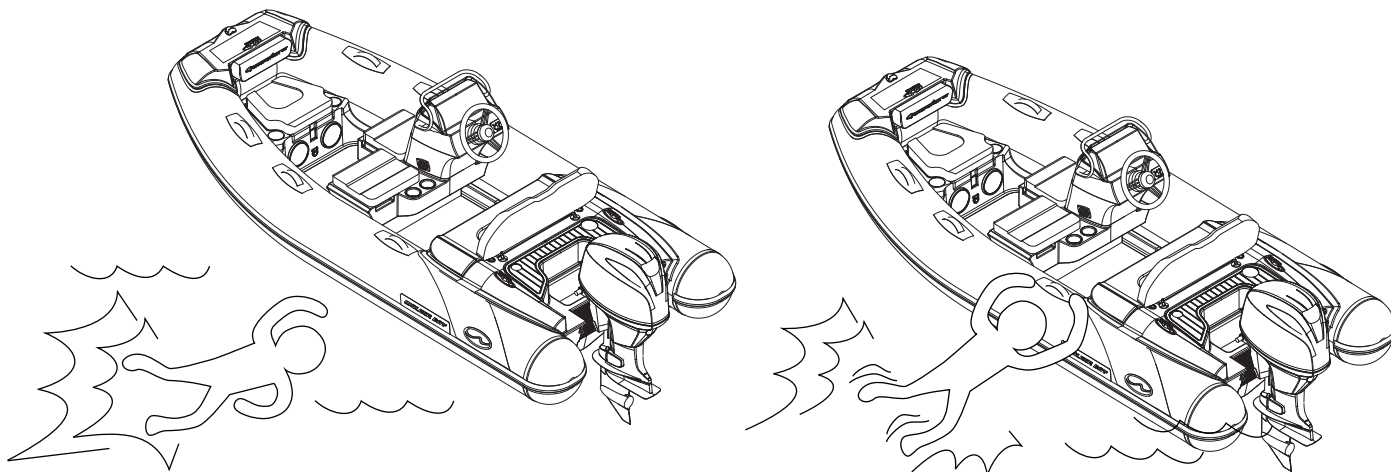

WALKER BAY

In the event a passenger falls overboard, there are several ways to re-board a Walker Bay boat from the water.

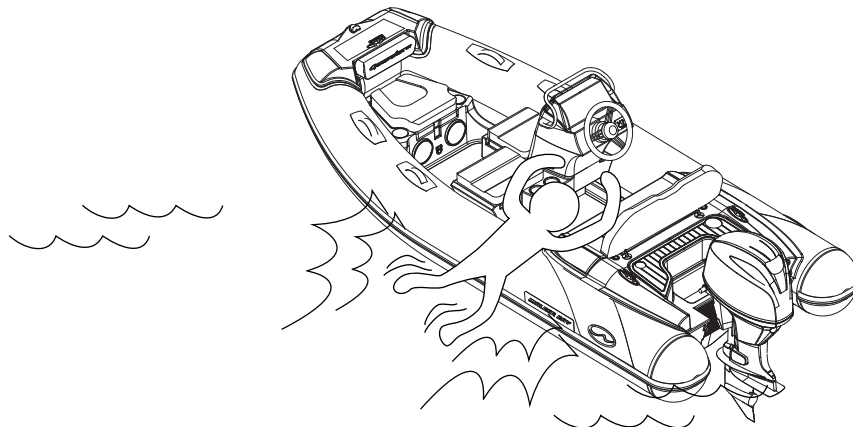

The Generation 13 LTE model can be equipped with a ladder to facilitate re-boarding, however depending on the configuration of the boat there may or may not be a ladder for re-boarding, the re-boarding procedure without a ladder is described below:

- ① Swim to the port side of your boat.

- ② Grab the handle that is located on the top of the inflatable tube.

- ③ Hold your breath then pull hard on the handle so that you pull yourself up and your abdomen rests on the tube

UNAIDED REBOARDING
